

Elizabeth's Story

I am Elizabeth Aino Odhiambo. I reside at Mbita, Homabay County. Initially, I used to go for medical services to a different hospital. At one time I fell critically ill and after constant visit to various hospitals without much change; my brother suggested that I try Matangwe Hospital. He, my brother, went ahead to accompany me to Matangwe Hospital. The doctor took his time with me to find out what the problem. He even asked about my medical history which also helped him in his diagnosis. Tests were done and finally I got admitted for close supervision. I was admitted for one week.

During my stay at the hospital, the attention I received from the medical personnel impressed me. They would constantly check on me, provide my medication on time, talk to me and encourage me. In addition to that, I would hear them pray for me in the morning and at times I would join them during the morning devotions. This act gave me hope

After being discharged from hospital, I stayed home for some time and thereafter I conceived. The care I received from Matangwe Hospital motivated to start my clinic there. I also used to pick my medication [Antiretroviral Drugs] at another hospital but I requested the doctors there to write me a transfer note so that I shift to Matangwe Hospital. Currently, Matangwe Hospital is my facility of choice for all my health care services.

I acknowledge that Matangwe Hospital offers the best medical services to patients. Patients are given full attention by the medical personnel and this makes me keep coming for medication. I am ever lured by the services offered at Matangwe Hospital. The doctors and nurses are always willing to answer the questions that I may have and this has resulted to a great and positive impact in my health status

Elizabeth A. Odhiambo
